

CANDY CRUSHER

Goal: Get the most points!
Make rows of three or more.

HOW TO PLAY

To begin, select a candy.

The person with the most cavities gets to pick first.

There are two phases in the game.

1) Drop and 2) Swap or Smash

1) DROP

The last person to pick candy gets to go first. They choose the starting side.

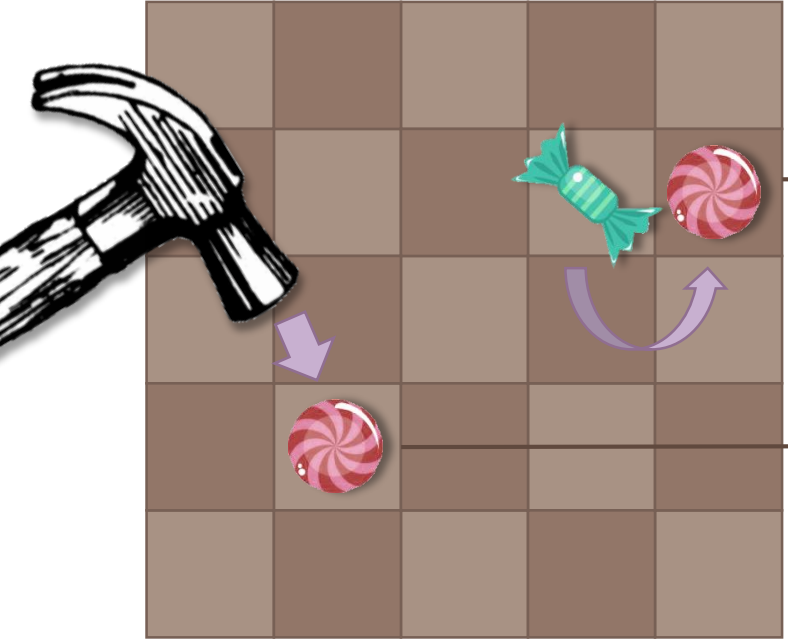

Take turns placing candy on one of the five tiles on the starting side. When a piece is placed on a tile, all pieces in that column get pushed down.

Players continue to place candies until all tiles on the board are full.

2) SWAP or SMASH

4.

In this phase, players take turns either swapping or smashing.

SWAP – Swap two pieces that are next to each other. Use this to make longer rows!

SMASH – Smash a piece. This can be your candy, or your opponent's candy! When a piece is smashed, it can no longer be swapped.

Continue swapping or smashing until players are satisfied, or there are no more moves that can be made.

SCORE GUIDE

- 6 pts
- 10 pts
- 15 pts
